Arena Multimedia, Ahmedabad, Gujarat, India.

For me development is interesting.

Set out to create an experience and you'll soon discover that there are no magic bullets, very few quick wins, and a lot of room to be very surprised when people actually use what you built. That's what makes Developer so interesting and why I keep trying to do it well.

"I am Passionate about what I do and always give 100%, while undertaking a project or task, I don't just complete it, I go the extra mile and make it better than requested."
